### Our Mission

To build with integrity while exceeding the expectations of our clients, business partners, employees, and communities.

Lorem ipsum dolor sit amet, consec tetur adipiscing elit.

### Values at Our Core

Brasfield & Gorrie holds our core values in the highest regard, and we are proud of the solid reputation we have earned as a company based on ethical ideals.

Our Values are:

Safety

People

Rewarding Work Environment

Commitment to Excellence

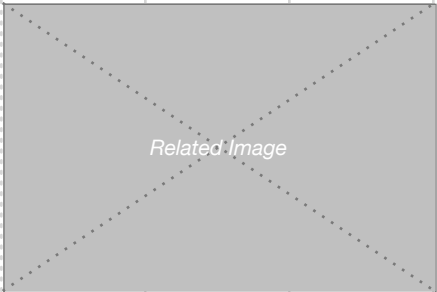

Integrity

Teamwork

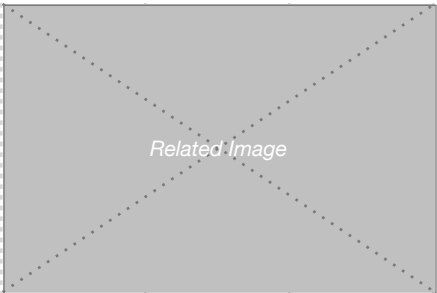

Stewardship

Our vision for the company is to be the best general contractor in the United States. As we look toward the future of the company, one thing we know for certain is that we intend to continue the tradition of excellence upon which Brasfield & Gorrie was built. And, our people are the reason we will be successful.

## Our History

Brasfield & Gorrie was formed in 1964 when founder Miller Gorrie purchased the construction assets of the Thomas C. Brasfield Company. Three years later, Mr. Gorrie decided to change the name to what it is currently known as today: Brasfield & Gorrie. Since its founding, Brasfield & Gorrie has steadily built its reputation to become one of the nation's leading contractors. We provide general contracting, design-build and construction management services for a wide variety of projects, including commercial, institutional, government, healthcare, municipal, and industrial and treatment markets.

We serve clients from offices in Atlanta, Birmingham, Columbus, Dallas, Jacksonville, Nashville, Orlando, and Raleigh. Brasfield & Gorrie has approximately 2,300 employees, and its 2011 revenues were \$1.7 billion. Engineering News-Record ranks the firm 32nd among the nation's "Top 400 Contractors" for 2012.

We are proud of our rich tradition of providing excellence to all of our clients and we continue to build success stories every day.

## Community Service

Brasfield & Gorrie employees exhibit the strong team spirit and sense of pride which is usually found only in small companies. They are encouraged by example and support to serve their communities as well as their company, and it is rare to find a local community organization or event that has not had Brasfield & Gorrie participation. Our corporate officers are acknowledged community leaders who have actively participated in or led countless business, civic, charitable and social organizations.

Employee involvement has earned our company the title of "Pacesetter Company" for United Way. Since 1992, Brasfield & Gorrie has led its division in the United Way campaign, increasing per capita contributions each year. Employees regularly help with such charitable events as the Leukemia Society Crawfish Boil, the United Cerebral Palsy Grand Prix, the Jingle Bell Run for Arthritis (B&G consistently fields the largest team in the state and is the top corporate contributor, ranking first in the nation in 1994 and 1995), the March of Dimes Blue Jeans for Babies, and Habitat for Humanity.

Brasfield & Gorrie places a high priority on giving back to the community that supports our business and fosters our families. Our company understands the difference we can make in the communities in which we live and work. Whether through monetary donations, time commitments or organized events, each year our company and our people make a tremendous impact on countless organizations and the people they serve.

Some of the organizations we have worked with in the past are:

- United Way
- Wounded Warrior Project
- Habitat for Humanity
- Make a Wish Foundation
- United Cerebral Palsy
- Salvation Army
- Leukemia and Lymphoma Society
- American Cancer Society

## General Contracting

As a self-performing general contractor, Brasfield & Gorrie joins your project team near the conclusion of the design phase, providing owners a traditional design-bid-build structure. Our team performs GC assignments on both a negotiated contract and bid basis. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Phasellus eleifend sagittis pretium. ## Construction Management

As a construction manager, Brasfield & Gorrie is prepared to provide service as either an owner's agent, whereby the client holds all trade contracts, or on an "at-risk" basis, whereby we become responsible for guaranteeing performance. Whichever is right for your project, we join your team through negotiated contract or the typical bid process and leverage our diverse experience to bring value to your project—achieving optimum cost, schedule, and most importantly, quality.

## Design-Build

Brasfield & Gorrie has participated in a large number of highly successful design-build projects, acting as a single point of contact for the client during the design and construction phases. The design-build approach provides owners with an efficient way to interface with engineering, architectural, and construction team members early on, and facilitates an efficient, cost-effective parallel coordination structure.

## Innovation and Technology

Brasfield & Gorrie is heavily committed to staying on the cutting edge of technology. Our in-house Virtual Design and Construction (VDC) Group is dedicated to implementing today's most advanced technology to provide for a lean construction process beginning at the earliest phases of design and continuing until completion.

The VDC approach is centered on the use of building information models (BIMs) and implements multiple BIM software platforms for specific uses in preconstruction planning, estimating, construction coordination, and facilities management. Because we offer a variety of VDC services, choosing a plan that incorporates the right combination is a critical step for each project. As part of the project team, we will provide our expertise and offer the leadership necessary for BIM development by using our Project BIM Plans (PBPs), project-specific plans formulated for transitioning the use of the technology as a tool for design to construction and ultimately for facility management. We implement a wide range of VDC services to facilitate efficiency in every aspect of construction, from pricing to closeout, and we clearly communicate our plans along the way. To perform these services, we have a proven tool kit of software platforms, including Revit®, Tekla®, Autodesk® Quantity Takeoff (QTO), Synchro, and Autodesk Navisworks®. For a full list, click here to view our VDC tool kit.

Lorem ipsum dolor sit amet, consec tetur adipiscing elit.

### Building Information Modeling (BIM)

#### 2D Transformations and Construction Model Enhancements

If a project is designed in traditional two-dimensional (2D) CAD software, our in-house modeling team will transform the design from 2D to BIM. If we receive BIMs from the design team, we will analyze and enhance those models for use in construction planning, estimating, and coordination.

#### Model-Based Quantity Takeoff

We use BIMs to extract quantities and provide real-time costing in our estimate.

#### Four-Dimensional (4D) Scheduling

By linking the model to the project schedule, we provide an animation of the construction at any point in time, making complex phasing and sequencing easy to understand.

#### Site Logistics (Still, Animated, and Virtual)

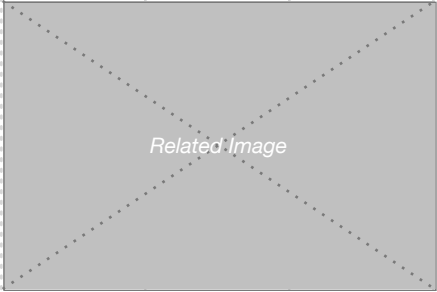

We provide three-dimensional (3D) visuals in a still, animated, or interactive format that allows for easy understanding of the logistics of our construction sites, including traffic, fencing, access points, material staging, temporary structures, construction trailers, crane swings, and more.

#### Concrete Formwork Design/Material Planning

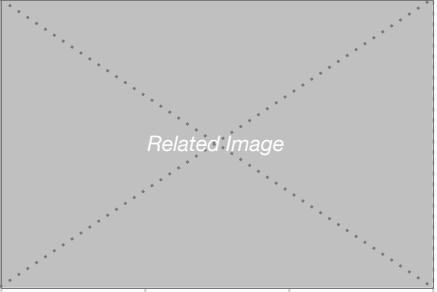

For our self-perform concrete projects, we generate accurately detailed, project-specific assembly instructions for our formwork systems using Tekla Structures software. We fully detail complex reinforced concrete structures, including rebar, for formwork design, material re-use strategies, and assembly during construction.

#### Coordination via Clash Detection

Working with our subcontractor team, Brasfield & Gorrie manages the coordination of all underground and overhead work virtually to ensure that all conflicts are solved and that accessibility for future maintenance is ensured before starting fabrication or installation in the field. By doing so, we can avoid complications in the field that take time and money to solve. This process is an important part of the Project BIM Plan and ultimately results in the largest return on investment for VDC services. On the average project, we resolve thousands of clashes through this process and save anywhere from tens of thousands to millions of dollars by creating opportunities for prefabrication, avoiding rework in the field, reducing material waste, reducing jobsite clutter, and implementing more efficient lavout methods

Lorem ipsum dolor sit amet, consec tetur adipiscing elit.

Lorem ipsum dolor sit amet, consec tetur adipiscing elit.

Prefabrication Assembly Design, Coordination, and Installation Sequencing

As part of the coordination process, we continuously look for opportunities to reduce costs in time and labor by prefabricating multiple trade assemblies off site ahead of schedule. To achieve this, we work with our trade contractor partners to plan, execute, and schedule these assemblies for seamless construction, delivery, and installation in the field. This is all done virtually using 3D models and clash detection software.

Virtual Mock-Ups

As a less expensive alternative to real-life mockups, we provide virtual mockups of any aspects of our projects to full levels of detail, including exact material finishes, dimensions, furnishings, and equipment. Mockups can be provided as still renderings, animated walk-throughs, interactive space models, or all of the above.

↑ Back to top

Construction BIM

Living As-Builts

During construction, we constantly update the models with as-built conditions, creating a “living” virtual replica of the project for reference during and after construction. We ensure quality through several methods, including BIM tablets in the field, field measuring, and laser scanning.

Material Tracking and Tablet Integration

By default, our BIM authoring software assigns a unique identifier to each part of the model, allowing us to use that number in combination with tablets and barcode/RFID scanners to track material deliveries, installations, and commissioning by color-coding the model to match various stages of construction.

Laser Scanning

We use laser scanning to supplement the VDC process by capturing existing conditions to create a model of an existing space or to verify that installations in the field match coordinated fabrication models.

↑ Back to top

Operations BIM

Facility Management

The content and organization of the final BIMs will be based on the client’s preferences and intended use. Whether the as-built BIMs are intended to be used in correlation with a FM software platform or viewed through Navisworks Freedom, we are committed to providing for our client’s needs and assisting in determining the product with the most value.

## Sustainability

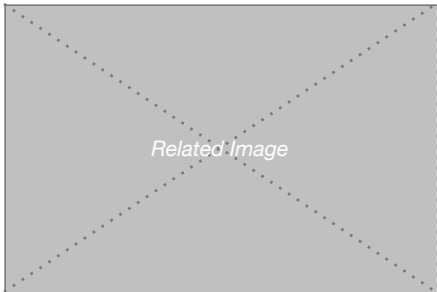

Brasfield & Gorrie places a priority on sustainability practices by ensuring that it spans our entire business process, from our construction practices to our people and everyday actions. In fact, Stewardship of the Environment is instilled as one of our core company values. Beyond development of extensive sustainable pre-construction and construction expertise, we have also implemented regular community litter pick-ups, green lunch-and-learns, business-wide environmentally sustainable practices, corporate recycling programs and similar initiatives. Also, when plans for our Corporate Headquarters were developed, we established achieving Leadership in Energy and Environmental Design (LEED) Certification as one of our design and construction goals and it became the first LEED Certified Corporate Office Building in Alabama. As a result of these efforts, our clients, our employees, our projects and our communities benefit from the positive impacts of sustainable design and construction.

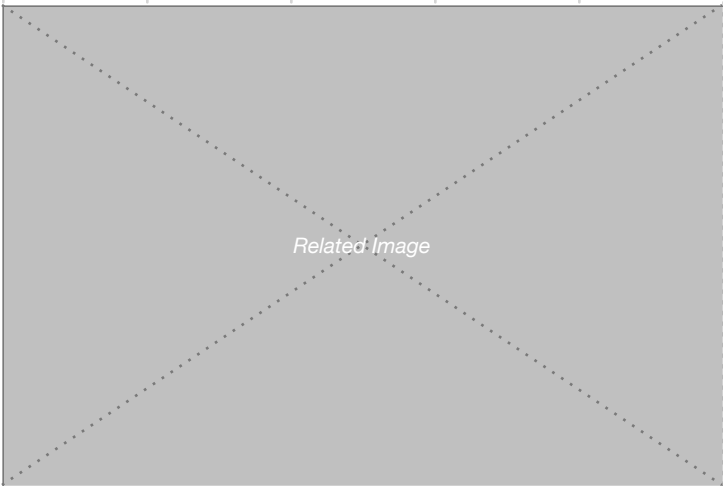

Lorem ipsum dolor sit amet, consec tetur adipiscing elit.

Lorem ipsum dolor sit amet, consec tetur adipiscing elit.

Lorem ipsum dolor sit amet, consec tetur adipiscing elit.

Lorem ipsum dolor sit amet, consectetur adipiscing elit.

### Proactive Sustainability

Brasfield & Gorrie supports LEED for the benefit of the built environment – and the preservation of our natural one. In addition, Brasfield & Gorrie has challenged every one of our Project Managers, Estimators and Field Employees to become a LEED Accredited Professional. So far over 225 employees companywide have proudly met that challenge.

In addition, Brasfield & Gorrie boasts an impressive portfolio of LEED buildings. In total, we've constructed over 40 sustainable facilities of ranging from tenant refits to 1.3 million sf mixed-used developments. This experience has provided us the pre-construction and construction expertise to successfully deliver economical and efficient sustainable facilities, regardless of size or scope.

[↑ Back to top](#)

### Financial Benefit

According to the United States Green Building Council, there will be \$554 billion in in green construction between 2009 and 2013. For many owners, the environmental benefits of a sustainable building also translate into business advantages. Owners of green projects can expect an 8 to 9 percent decrease in operating costs, a 6.6 percent improvement on return on investment and a 7.5 percent increase in building value.

[↑ Back to top](#)

### Environmental Benefit

The economic advantages, while great, are not the most important when constructing LEED buildings. The environmental benefits are even greater. The following are a few of these advantages:

- Improved air and water quality
- Reduced solid waste
- Water and natural resource conservation
- Enhance and protect ecosystems
- Reduced greenhouse gas emissions

## Subcontractors and Vendors

At Brasfield & Gorrie, we are proud to call subcontractors a part of our family. We've worked with some of the most dedicated and skilled contractors in the industry, and we are always looking to connect with more. If you're interested in working with us, please follow the links in this section of our site. You'll find information about our fairness policies, our approach to minority participation, projects out for bid, and a vendor prequalification form where you can tell us more about your company. We look forward to working with you.

In an effort to better understand your company's qualifications to perform work for Brasfield & Gorrie, we request that all subcontractors and suppliers complete our Qualification Form.

Qualification Form

### Minority Outreach

At Brasfield & Gorrie, we recognize that a healthy construction community is a diverse one. For this reason, we take a proactive role in involving the optimal number of minority companies in our work. We are proud to be an industry leader in this endeavor—providing minority contractors with training, special assistance and counseling in the areas of accounting, estimating, marketing and more.

# Brasfield & Gorrie tops out Omni Nashville Hotel, Country Music Hall of Fame expansion

December 11, 2012

in

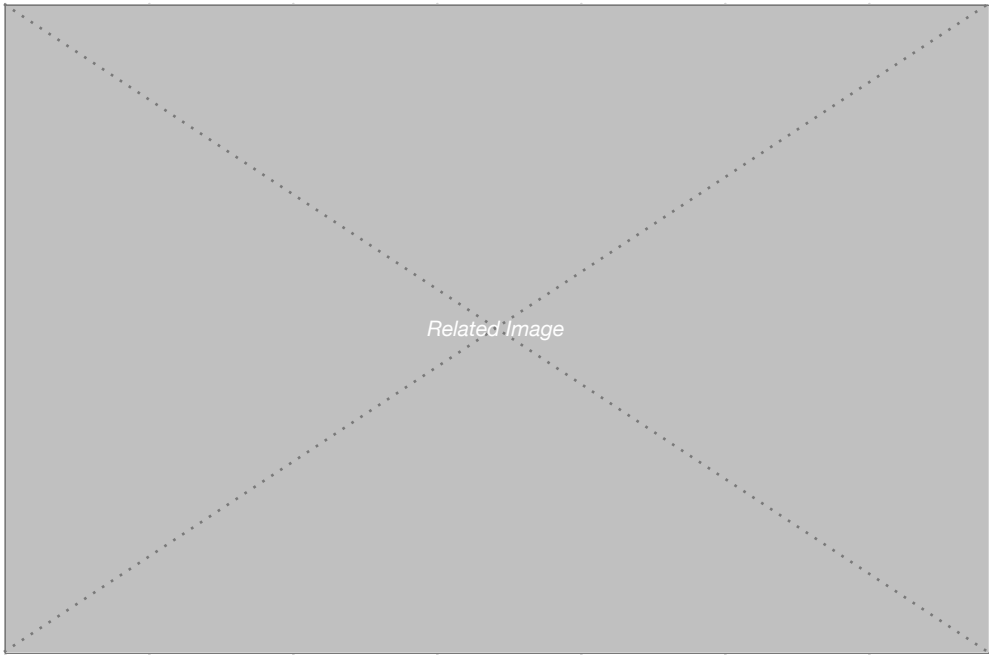

41

f

25

t

12

BIRMINGHAM, Alabama - Birmingham-based construction company Brasfield & Gorrie has topped out construction on the new Omni Nashville Hotel and Country Music Hall of Fame and Museum, the company announced.

The hotel and museum expansion are part of a convention center expansion valued at more than \$600 million.

The 1.4 million square-foot project includes the 800-room hotel and 225,000 square feet of new space in the hall of fame. Construction on the hotel began in June, 2011 and it is expected to open in the fall of 2013.

Rob Blalock, vice president and division manager at Brasfield & Gorrie, said luxury hotels will be in increasing demand as the economy rebounds and business travel picks up.

The hotel will include a 124,000 square-foot ballroom, a 200-seat live event venue, an 800-seat music theater and two restaurants.
